

Airway Management

CANADIAN
RED CROSS
TRAINING
PARTNER

Heart
Association®

AUTHORIZED
TRAINING
CENTER

Designed to provide participants with the knowledge and skills to create a patent airway, the interventions to maintain it, and the equipment available to carry out these skills. Participants will gain the knowledge and skills required to provide the appropriate interventions, including measuring and inserting the applicable airway adjunct based on the patient's condition. Course can also be combined with Basic Life Support training for additional certification.

Audience

In-facility and health care providers (nursing, care aides, dental industry, medical offices etc.), pre-hospital care groups (fire departments, rescue teams, sports therapists, lifeguards, SCUBA divers, ski patrol, etc.).

Duration

1-2 hours stand-alone course
1 hour when combined with Basic Life Support

Prerequisites

None

Completion

- Successfully demonstrate all course skill competencies
- Minimum 75% mark for written, closed book, knowledge evaluation
- Attend and participate in 100% of the course
